Software Engineer

ali.alayafiii@gmail.com • [+966 556927399](tel:+966556927399) • Saudi Arabia • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Full-Stack Software Engineer and recent Computer Science graduate with First-Class Honors (3.81/4.0) and over seven years of programming experience since 2018. Proven in designing and delivering scalable solutions through freelance projects using multiple frameworks and languages. Eager to apply problem-solving and collaboration skills to innovative software engineering teams.

EDUCATION

Bachelor's in Computer Science (3.81/4.0)
Umm Al-Qura University (UQU) • 2025

EXPERIENCE

Freelance Full-Stack Software Engineer

Various Projects | Saudi Arabia • Jan 2018 - Present

- Developed CvFlow platform to enable job seekers to create and optimize ATS-friendly CVs, serving over 500 users with modern templates and tools.
- Built UniStay platform connecting students with accommodations, featuring search, listings, and direct communication using React, Node.js, and databases.
- Engineered Qaddr AI tool for estimating car damage costs from images, integrating AI reviews, dispute management, Python machine learning, and MERN stack.

PROJECTS

CvFlow

Platform for creating ATS-optimized CVs with templates, optimization tools, and structure modification.

Tech: Next.js, JOI, Shadcn, TailwindCSS, MongoDB

[Link](#)

UniStay

Platform connecting students with property owners for university accommodations, including search, listings, and messaging.

Tech: NextJS, Auth.js, Shadcn, TailwindCSS, MongoDB

[Link](#)

Qaddr

AI-powered platform for estimating car damage costs from accident images with verification and dispute handling.

Tech: Node.js, Express, EJS, TailwindCSS, Python, AI/ML, MongoDB

[Link](#)

MenuCreator

Built a platform for restaurant owners to create/manage digital menus with AI, QR codes, visitor stats, real-time edits, and multi-menu support.

Tech: Node.js, Express, EJS, Tailwind CSS, OAuth, MongoDB
